Re: *State of Oklahoma v. Tyson et al.*, No. 05-CV-0329-GKF-SAJ

Dear Michael:

Pursuant to the Court's order of January 5, 2007 (Dkt. 1016), and without waiving our objections, we are today FedExing to you STOK-CD87, along with an index of the data being produced.

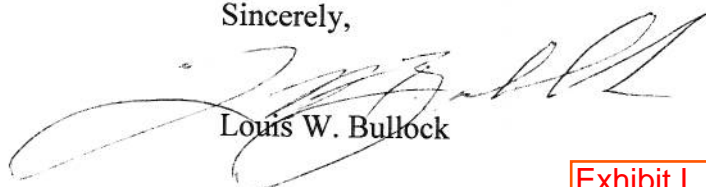

Included with this production is sampling that has been undertaken by the Oklahoma Scenic Rivers Commission (OSRC). As I have stated before, while the production of the OSRC data may be covered by other discovery from the Defendants, it is not subject to the Court's January 5, 2007 Order or the Court's Order which requires expedited production of the results of the analysis of data collected by the State's retained experts. These materials are being produced in this expedited fashion as an accommodation.

Also included in this production are photos from the recent sampling of Lake Tenkiller. The field book and data sheets for the July 9 sampling were included in the July 16 production.

Also included is preliminary data from Aquatic Research. The production of this data is being expedited pursuant to the Defendants' request and the Court's Order (Dkt. 1710). It is important to understand that in order to expedite the production of this data, we have not been able to complete our internal QA/QC process this data. When that review is completed, we will supplement the production.

Should you have any questions concerning this production, please do not hesitate to call.

Sincerely,

Louis W. Bullock
